This directory contains the data and programs to reproduce the tables in “Monitoring Corruption: Evidence from a Field Experiment in Indonesia.” The data and programs are in STATA 9.0 format.

To reproduce the results, simply run “070306analysisjpe.do.” The resulting files correspond to the tables in the paper as follows:

Table 2:	tabletreatmentsrandom.out
Table 3:	tableauditsumstats.out
Table 4:	tableauditmeans.out
Table 5:	tableauditpricequantities.out
Table 6:	tableauditresults.out
Table 7:	summary statistics shown at end of running do file
Table 8:	tableauditnep.out
Table 9:	tableundfpmfirststage.out
Table 10:	tableundfpmprobres.out
Table 11:	Panel A: tableinvitemeans.out Panel B: tablecommentmeans.out
Table 12:	Panel A: tableinvitemeanssd.out Panel B: tablecommentmeans.out

The following datafiles are included in the directory:

jperoaddata	Main data on villages and roads. One observation per village.
jpehouseholddata	Household survey. One observation per household
jpemeetingdata	Data from village meetings. One observation per meeting
jpeproblemdata	Data on problems at meetings. One observation per meeting.
jperandomizationdata	Data for checking that treatments were random. One observation per village.
jpeauditdata	Data on auditors’ final reports

All variables are labeled. For constructed variables (i.e., missing expenditures (variable: Indiffeall4), detailed descriptions of how variable was constructed can be found in the text.
